

It is the propose and goal of this program to teach each participant the skills necessary to actively participate in a true northern wilderness adventure. It has become our tradition that returning Voyageurs, young and old Alike, conduct the training of the new Candidates. Who knows better than they what is expected and accepted. In this way, the Voyageur reinforces their skills in a true teaching environment. It is the responsibility of the Candidate to learn, and of the Voyageur to Grow.

You will learn Skills and traditional ways of a bygone era. To pass a skill on to another is the best way to keel that skill alive.

Share with us the warmth of the campfire, the joy of voices raised in song and the lifelong friendships that can only be made when you learn to depend on others as they depend on you.
